**Kind Attn : Mr. M.Q. Shaikh / Mr. S.M. Joshi**

We take this opportunity to express our appreciation in finding a lubricant of immense importance in various critical applications. We are using OMEGA lubricants for a long time now and would like to comment on the saving & benefits gained by OMEGA lubricants.

**OMEGA 690 Gear Oil** – was applied in few of our critical machine gear boxes (Roatary Printing, Stanter machine) one and half year ago; all the gearboxes are running without any heat built-up and breakdown. We have also achieved power savings by using OMEGA 690 in the gearboxes.

**OMEGA-95 Water Resistance Grease** – We have used this grease in our bleaching plant roller bearings where water directly comes in cöntact. And it has given us excellent results. Regreasing interval has been extended phenomenally from earlier once in fifteen days to once in four months. It has also reduced the bearing failure drastically in this area.

**OMEGA-85 High Temprature Grease** – We are using this grease in the bearings of I.D Fan, F.D. Fan, Stanter Chamber Fan Bearing and electric motor bearings of Stanter. For last one and half year we have not faced any bearing failure in these areas. In stanter chamber fan bearing and electric motor bearing we have not done regreasing after the application and still the bearings are running fine.

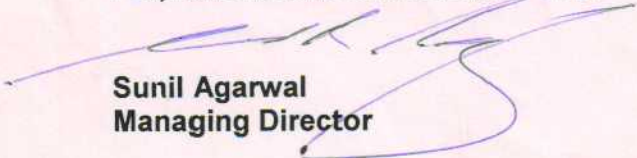

**OMEGA-613 Compressor Oil** – was applied in our reciprocating compressors one year ago. Earlier we were using conventional compressor oil and we used to do the oil top up every 10 days due to evaporation loss and there was the major problem of Carbon deposition on the valves. After switching over to OMEGA 613 we have not done any oil top up in last one year and compressors are running absolutely fine.

We are very satisfied with the products and especially the services and technical assistance provided by their engineers during the application and observing the performance of the products by regular inspections after applications.

We are highly satisfied with performance of OMEGA products and we have no hesitation in recommending these products to anyone interested prolonging the life of their machinery.

With Regards

For, RAGHUVIR SYNTHETICS LTD.
